Tom,

Attached are revisions based on draft comments and our follow-up discussion. If you would like to discuss any of the changes, we are available and could set up a meeting for tomorrow (Thursday 3/31) during the morning hours.

Ryan,

I have attach to this email EPA's draft comments to the March, 2016 West Lake Landfill Vicinity Radiological Survey and Sampling Final Report. I understand that you are working up against a deadline to finalize this report in March. We would like to have one more discussion as

early next week as possible to get your thoughts on these comments. I would suggest Monday afternoon or Tuesday morning but I'll try to accommodate whatever works best for your team.

Thanks for the opportunity to comment,

Tom Mahler

I think noon Friday will give us enough time to get comments from Chuck.

I will be around all day tomorrow and available to discuss the recent sediment sampling and any other Surface Fire Mitigation Removal topic we need to touch base on. Just let me know what time is best for you.

Thanks for the extra time,

Tom

**Subject:** RE: Comments to the Final Vicinity Sampling report

Thanks for the email Tom. We appreciate Chuck's review, would noon Friday be enough time to incorporate his feedback? We also owe you a call on the sediment sampling topic. Are you around tomorrow?

Thanks!

Branden

**Subject:** Comments to the Final Vicinity Sampling report

Hey Ryan,

Just wanted to let you know we (Brad, Justin, and myself) are working on comments to the final version of the Vicinity sampling report. We plan to have something to you today but it will likely be pretty late this afternoon as we are also working on releasing a significant portion of the data associated with the Phase 1 report to the public today.

Also, just know that Chuck Hooper (Our CHP) has been out of the office participating in an radiation exercise since Tuesday and has not been able to provide any comments at this point. I would really like to get some feedback from Chuck before we provide our comments. He is back in the office first thing tomorrow morning. Is there any chance we could have just a little more time in order to get feedback from Chuck as well?

Let me know what you think.

Thanks,

Tom Mahler
